

# AMMIQUE BED TECHNOLOGY

---

Ammique are bold enough to liken their unique bed technology to innovations such as “the first vacuum cleaners and the first motor cars.” Just as these offered real alternatives to brooms and horse-drawn carriages revolutionising their respective industries, the Ammique bed is a total re-invention: “Unlike any other bed in the world, it is not a mattress nor does it require a mattress.”

Using exclusive, patented technology, the Ammique bed is described as “the world’s first bed to offer all five benefits of comfort, consistency, hygiene, air flow and adaptability.”

But such handmade high-specification doesn’t come cheap. Prices start at £13,950. Hotels such as the Bath Priory and Cotswold House have already invested in them, and CBS News recently described the Ammique bed as a “phenomenon.” **Tel: 01761 419544 [www.ammique.com](http://www.ammique.com)**
