"State of the art technologies, innovative business strategies"

Behind the scenes on World Business Review:

From the interview on World Business Review by General Norman Schwarzkopf and Jordon Goodman with Frank Wolfe CEO of Hospitality Financial and Technology Professionals:

JG: "Frank, tell us about some of the more interesting technologies that your members, clubs, hotels and casinos might be doing that guests might see in future years."

FW: "For example, we have a bed that we have located that does not have a mattress; it has over 20,000 pistons so the housekeeper never has to flip it over. It is a very comfortable product..."
