

# THE SLEEPING REVOLUTION

## AMMIQUE AT THE BATH PRIORY

When The Bath Priory was asked whether it would like a "revolutionary sleep system", everyone was a little baffled. However, once we had met the dynamic design team, and Midsomer Norton based company "Ammique", The Bath Priory needed no convincing. Every hotel has a duty to offer its guests the best night's sleep possible, and the "Ammique Sleep System" is truly a 21st Century bed, which can be customised for even the most classic of English bedrooms. Using an ingenious suspension system, Ammique has designed and manufactured the most luxurious, comfortable, hygienic bed, which will last a life time. Anyone with back, neck or even sleeping difficulties, will benefit from the design which offers all over body support and the ideal sleeping position. Lovers of aesthetics and design have been drawn to the Ammique Sleep Systems, which were launched at the international design show, DECOREX, in 2004.

The Bath Priory is the first hotel to incorporate an Ammique bed and its Ammique Suite truly shows that such a contemporary product can be customised to a most classical bedroom and suite. Guests have loved it, and suffice to say, The Bath Priory housekeeping team adore its practicality!

We are very proud to support such an innovative local company at its infancy and can truly offer our guests a legitimate excuse to spend the cold winter with extra hours in bed!

For details on Ammique, visit [www.ammique.com](http://www.ammique.com) or The Bath Priory's own website.
