

AMMIQUE'S GRAND DESIGNS

Ammique made its retail launch in London at Grand Designs Live Exhibition where a sexy computer-lit model took centre stage in the Grand Interiors section. A new range of stunning finishes and exquisite fabrics was also showcased, as well as the solution to the perfect nights sleep. Soft curves and the mellow grain of carefully selected timber combine with straight lines in the Drift collection – finished either in Maple, Cherry or Oak. A vibrant head panel set on a Canadian Maple frame accompany a fusion of glass segments in the juicy Fuse Collection, and there's no mistaking the tactile quality of sensuous leather in Touch. This is a collection that oozes elegance at every stitch and seam. The exclusive selection of fabrics have been specially designed by Hannah White for Ammique in silk, chenille or linen. To complete the bedroom, Ammique offers a range of essential, superior companion products such as duvets and pillows. Pure white 100% Egyptian cotton

duvet covers, pillow slips and tailored sheets are also available as well as quilted coversofts. The Ammique team believes passionately that sleep and the sleeping environment is too important to settle for traditional bed designs and throwaway mattresses. Which is why, by pushing the boundaries, the company has developed a state-of-the-art alternative. The Ammique is a radical design which has been inspired by the fundamental need to sleep well and function at 100% despite hectic lifestyles. Throughout the night the Ammique responds to your every movement no matter how slight, constantly yielding you. There is no need to toss and turn because you will be held in the perfect sleeping position. The Ammique is a highly sophisticated innovation, hand built in the UK and offering long term consistent support and reassurance.
