▲ SLEEP WELL

The design team at Ammique has developed a suspension system that supports the body in the ideal sleeping position by contouring to its natural curves, regardless of weight, shape or movement. The Ammique sleeping surface is comfortable and hygienic, with excellent air flow, as well as stylish and versatile. Every aspect has been thoroughly researched and carefully factored into the overall system. The interchangeable panels along the width and length can be easily replaced to suit fluctuating trends, while also allowing self expression and individuality. **CIRCLE 129**
